## Preface

It is with great joy and gratitude that I present the third volume of my collected essays – which follows “Die Herrlichkeit des Gekreuzigten” (WUNT 307) on the Johannine Literature and “Von Jesus zur neutestamentlichen Theologie” (WUNT 368) on various topics of New Testament theology – a volume containing studies on the Dead Sea Scrolls and their relevance for understanding the New Testament. Although I am primarily a New Testament scholar, and my main duty is teaching New Testament exegesis, the Qumran discoveries have been a particular source of fascination from the very beginning of my studies, and the community of Qumran scholarship has been a source of joy up to the present. In spite of all the scholarly calls for critical sobriety, this volume also intends to show that the scrolls are still a source of surprising discoveries and inspirations, and that the insights from the Dead Sea discoveries are still not sufficiently taken into consideration in New Testament scholarship.

Unlike the two earlier volumes of my “Kleine Schriften,” this volume is completely in English. I am particularly grateful that Jacob Cerone, who has worked for me as a language corrector and editor for a few years, was willing not only to translate hundreds of pages of rather technical texts, but also to take the editorial responsibility for the present volume, including the index of ancient sources and the preparation of the camera-ready version. Without his skillful, diligent, and meticulous work, the volume would not have been possible. I am also grateful to the Theological Faculty of the University of Zurich for granting support for the translation costs, to my co-editors in the WUNT series for accepting the suggested volume, and to Mohr Siebeck publishers, in particular Katharina Gutekunst, Elena Müller, and Matthias Spitzner, for all their support. All publishers of the original publications of the article presented here have generously expressed their consent for republication.

The volume is dedicated to the lovely person who did most to make me feel at home in Switzerland. She looked for evil and its origins, and thereby found me, and through her love she makes my life enjoyable and bright.

## Introduction: Qumran, Ancient Judaism, and the New Testament

The present volume – the third volume of my collected essays or “Kleine Schriften”<sup>1</sup> – collects my work on the Dead Sea Scrolls and their relevance for and relation to the understanding of New Testament texts. The studies presented here, some for the first time in English translation, cover a time span of over 20 years, from the mid 1990s until the present. In this period, the official edition of the Qumran corpus was completed and fervent debates on archaeological issues were performed in a greater public, but due to the larger database and to refined methodologies or research also the insights concerning a large number of texts were considerably multiplied. Although the number of scholars occupied with the Dead Sea Scrolls has increased considerably on an international level with a much more intense involvement of Jewish colleagues and Hebrew language scholarship, Qumran scholarship has also become a highly specialized area, whose issues and problems are often hidden to scholars without this specialization, so that their knowledge and even the basic knowledge spread in classroom books often is outdated and untouched by the insights gained in the last 25 or 30 years.

The studies collected in the present volume are an attempt to bridge the gap between Qumran and Biblical or New Testament studies. Presented partly in the context of specialized Dead Sea Scrolls scholarship, partly in a wider context of biblical scholars or theologians, they aim at transmitting new textual observations and refined methodological considerations into biblical scholarship in order to enable biblical scholars to adequately perceive the insights from the Qumran corpus and the benefits they lend to the understanding of early Christian texts.

<sup>1</sup> I owe the subtitle to my academic teacher, Martin Hengel, whose collected essays also appeared as “Kleine Schriften” in seven volumes in the WUNT series. Cf. my first two volumes on Johannine Literature and on selected historical and theological issues in the New Testament: Jörg Frey, *Die Herrlichkeit des Gekreuzigten: Studien zu den johanneischen Schriften 1* (ed. J. Schlegel; WUNT 307; Tübingen: Mohr Siebeck, 2013); idem, *Von Jesus zur neutestamentlichen Theologie: Kleine Schriften 2* (ed. B. Schliesser; WUNT 368; Tübingen: Mohr Siebeck, 2016).

### A. My Story with Qumran

My own interest in the Dead Sea Scrolls was stimulated quite early. In my first semester of studying theology at the University of Tübingen, in the autumn semester of 1983, I attended Martin Hengel's lectures on "Christology of the New Testament," and in these unforgettable dense lectures, I was quickly confronted with evidence from the wealth of early Jewish texts, from the late layers of the Hebrew Bible, the Enochic tradition and Apocalypticism, from early Rabbinic traditions and the Hekhalot literature and – within this wide spectrum – also from the Qumran discoveries. When I was asked to serve as Hengel's student assistant in the following year, for proofreading his articles and checking references, I came across a great wealth of texts and scholarly views and so became aware of the crucial importance of the Qumran corpus. However, the period in the mid-1980s was still a time in which the majority of the fragmentary documents was not yet accessible to the greater scholarly public, but only to an 'inner circle' of the editors entrusted with the texts. In addition, some privileged younger scholars were asked to assist the editors, and were thus granted limited access to certain texts. I still remember Hengel's polemical remarks about the slow speed of the editorial process and the alleged laziness of some of the editors who – according to his words – just 'sat' on their texts, instead of making them accessible to the interested scholarly public. When I studied for a year in Jerusalem, in 1987–88, in the German study program at the Dormition Abbey on Mt. Zion, I was fascinated by a lecture by the late John Strugnell in the École Biblique on a text which was then called an "Angelic Liturgy" and is now well-known as the *Songs of the Sabbath Sacrifice*. I eagerly captured some information about an alleged letter of the Teacher of Righteousness now known as 4QMMT which immediately stimulated the interest of Pauline scholars, but then became the object of a fervent legal battle about the authorial rights of the scholars entrusted with editing them, in conflict with the public eagerness for information and access.<sup>2</sup>

This was also the period in which conspiracy theories flourished, mostly focused on the alleged obscurantists in the Vatican who were readily accused of hiding the truth about the historical origins of Christianity or even hiding some important documents from the greater public.<sup>3</sup> The book market in those years was dominated by pseudo-scholarly unveiling literature, and

<sup>3</sup> The most successful work was the novelistic but purportedly historical book by M. Baigent and R. Leigh, *The Dead Sea Scrolls Deception* (New York: Summit Books, 1991), with its German translation entitled *Verschlusssache Jesus: Die Qumranrollen und die Wahrheit über das frühe Christentum* (trans. scholars had a hard job cultivating a sober discussion oriented on facts in contrast to such fabricated claims, as long as the bulk of the hitherto unedited fragments was still not publicly accessible. I still remember well how, during that time, when I worked as a doctoral student and as a vicar in southern Germany, there was a widespread interest and concern about what the ‘hidden’ texts could reveal about Jesus and early Christianity, and I was frequently asked for information about the contents and possible relevance of the finds for a comprehensive understanding of early Christian history and doctrine.

Times changed rapidly, and with the release of the microfiches of the scrolls and fragments entrusted to several libraries in the world for security reasons, by the California based Huntington Library and the publication of the facsimile edition in 1991,<sup>4</sup> the door was open to a new period in Qumran scholarship, a new “Qumran springtime,” with the quick release of editions of a large number of new texts by the enlarged editorial team under the leadership of Emanuel Tov. When I returned to Tübingen university in 1994 to work as an Assistant (lecturer) to Prof. Hermann Lichtenberger, the successor of Martin Hengel at the Tübingen *Institut für Antikes Judentum und Hellenistische Religionsgeschichte*, I became involved in the rapid development of Qumran scholarship and the conceptualization of new projects, e.g., of a synoptic edition of the biblical texts from Qumran conceptualized by Hermann Lichtenberger with my then colleague Armin Lange and some other colleagues from the institute, such as Friedrich Avemarie and Gerbern S. Oegema.<sup>5</sup> In Lichtenberger’s research seminar we started to read the newly released texts, first from the famous Wacholder-Abegg edition<sup>6</sup> compiled electronically from a privately printed preliminary concordance that had been crafted in the 1950s by some members of the first editorial team.<sup>7</sup> With that edition, legible Hebrew texts were available long before the ‘official’ edition of those texts appeared. For my own studies, the reading of the new Wisdom texts was particularly enlightening. In these texts, I discovered hitherto un-

known parallels to the Pauline language of “flesh” (and the opposition of “flesh” and “spirit”) which I first presented in my Habilitation lecture in 1998 at the Faculty of Protestant Theology of the University of Tübingen.<sup>8</sup>

Whereas my main scholarly work in those years was about New Testament texts, in particular the Johannine Literature,<sup>9</sup> but also Revelation<sup>10</sup> and Hebrews,<sup>11</sup> I was introduced into the ongoing progress of the edition and early evaluation of the ‘new’ texts from Qumran, through the collaboration with Hermann Lichtenberger and his second assistant, my then colleague Armin Lange. While Lange wrote his dissertation on the issue of determinism and predestination in the new Wisdom texts from Qumran,<sup>12</sup> I developed an analysis of the various types of dualism in the Qumran corpus with the main aim of refining the comparisons between the dualism in Qumran and the dualism in the Johannine literature. Again, the Qumran Wisdom texts could shed new light on the origins of Qumran dualism and also help to see the diversity of dualisms in the Qumran corpus which had to lead to a considerable modification of some earlier comparisons between Qumran and the New Testament. My initial research, presented in 1995 at the meeting of the IOQS in Cambridge was, then, developed into a large article<sup>13</sup> which provided the basis for

two other extensive German articles focusing on the comparison with Johannine dualism<sup>14</sup> and the function of dualistic language in the Gospel of John. These three extensive articles (two of them now available in English)<sup>15</sup> form a kind of successive ‘trilogy’ on dualism in Qumran and John.

During my time in Tübingen (1993–1997), I benefited immensely from the collaboration with Hermann Lichtenberger and Armin Lange, and since the IOQS conference in Cambridge in 1995, where I encountered a very friendly and helpful discussion of my considerations by John Collins, Joseph Fitzmyer, and Florentino García Martínez, I happily experienced the friendly and collegial atmosphere in the community of Qumran scholars, a relatively limited circle of researchers specialized on different texts but always open for exchange of information and mutual support. From German professors, I could never have expected such friendly and non-hierarchical responses as those I received among the scrolls scholars’ community, e.g., from John Collins, George Brooke, Hanan and Esther Eshel, Charlotte Hempel, Larry Schiffman, Eileen Schuller, Annette Steudel, Eibert Tigchelaar, and many others.

After I had been called in 1997 to the Friedrich-Schiller Universität Jena, and then in 1999 to the Ludwig-Maximilians-Universität in München as successor of the Qumran scholar Heinz-Wolfgang Kuhn, the Dead Sea Scrolls were a regular part of my teaching program in the field of New Testament

and Ancient Judaism. In 1999, I was asked to give a comprehensive paper on the relevance of the Qumran texts for the understanding of the New Testament at a symposium held in connection with a Qumran exhibition in the beautiful monastery library (Stiftsbibliothek) in Sankt Gallen (Switzerland), and I organized an excursion with some of my students from Jena to attend the conference and visit the exhibition. My paper, first published in German,<sup>16</sup> was the basis for a number of other shortened or more expanded and updated further publications on what now became my main focus in Qumran research: the impact of the new discoveries on New Testament scholarship and their relevance for understanding New Testament texts.<sup>17</sup>

In Munich I first considered joining the project to create a new catena of Qumran parallels to the New Testament, conceptualized but worked out only for the authentic Pauline epistles by my predecessor Heinz-Wolfgang Kuhn, but I soon got the impression that the problems had to be presented in a different form and that the structure of a catena was too inflexible for the presentation of the new texts and insights that could be gained from the rapidly edited new texts. This was particularly evident after a sounding conference had also brought the insight that the project of a “New Billerbeck” including the Dead Sea Scrolls and a variety of other ancient Jewish texts was not feasible for various reasons.<sup>18</sup> In 2002, I received a call to the University of Göttingen to take up the chair of the distinguished Qumran scholar Hartmut Stegemann, but the *Qumran-Forschungsstelle* had already been transferred to the Old Testament department and to Reinhard G. Kratz, and for various reasons I declined the Göttingen offer and remained several more years at the

An important stimulus for my continuous occupation with Qumran issues was the series of Qumran conferences, originally conceptualized by Hartmut Stegemann as a platform for intellectual exchange for German speaking Qumran scholars, in the Katholische Akademie Schwerte, an enjoyable conference destination near Dortmund. Having already contributed to the first two conferences,<sup>19</sup> I was, then, commissioned to succeed Hartmut Stegemann in organizing those conferences on a biennial basis. The subsequent conferences on the topics “Qumran and Apocalyptic” (2003),<sup>20</sup> “Qumran and the Biblical Canon” (2006),<sup>21</sup> “Qumran and Archaeology” (2008),<sup>22</sup> “Jesus, Paul and the Texts from Qumran” (2009),<sup>23</sup> “Dualism, Demonology, and Evil Figures” (2013),<sup>24</sup> “Women in Early Judaism and Early Christianity” (2015),<sup>25</sup> “Recent Perspectives on the Qumran Community” (2017),<sup>26</sup> and “Purity in Early Judaism and Early Christianity” (2019)<sup>27</sup> enjoyed increasing international representation and, at the same time, focused on including and introducing upcoming scholars into the field of Qumran studies and its wider context. In the organization of the conferences, kindly supported by the Schwerte academy, I could collaborate with the Göttingen Qumranforschungsstelle, represented by Annette Steudel, with Heinz-Josef Fabry

The introductions written for the conference volumes provided me with the opportunity to comprehensively discuss the problems within the field and to develop my own views on the topics and on the relevance of the Qumran findings for an appropriate understanding, e.g., of apocalyptic in early Judaism and early Christianity,<sup>28</sup> the relevance of the insights from Qumran for the conception of the biblical canon and the “canonical process,”<sup>29</sup> the interpretation of the archaeological remains at Qumran,<sup>30</sup> and the relevance of the Qumran discoveries for scholarship on Jesus and Paul.<sup>31</sup> In the Schwerte conferences, I have increasingly aimed at widening the scope beyond the Qumran corpus to include other testimonies from ancient Judaism, its Greco-Roman context, and from early Christianity. Other conferences organized in Zurich also covered a wider range of early Jewish testimonies, including the Samaritan traditions,<sup>32</sup> Apocalypticism,<sup>33</sup> Jewish and Christian concepts of angels,<sup>34</sup> and the interpretive processes in the making of ‘para-scriptural’ texts.<sup>35</sup>

# Wissenschaftliche Untersuchungen zum Neuen Testament

Edited by Jörg Frey (Zürich)

Associate Editors:

Markus Bockmuehl (Oxford) · James A. Kelhoffer (Uppsala)

J. Ross Wagner (Durham, NC)

*WUNT I* is an international series dealing with the entire field of early Christianity and its Jewish and Graeco-Roman environment. Its historical-philological profile and interdisciplinary outlook, which its long-term editor Martin Hengel was instrumental in establishing, is maintained by an international team of editors representing a wide range of the traditions and themes of New Testament scholarship. The sole criteria for acceptance to the series are the scholarly quality and lasting merit of the work being submitted. Apart from the specialist monographs of experienced researchers, some of which may be habitations, *WUNT I* features collections of essays by renowned scholars, source material collections and editions as well as conference proceedings in the form of a handbook on themes central to the discipline.

*WUNT II* complements the first series by offering a publishing platform in paperback for outstanding writing by up-and-coming young researchers. Dissertations and monographs are presented alongside innovative conference volumes on fundamental themes of New Testament research. Like Series I, it is marked by a historical-philological character and an international orientation that transcends exegetical schools and subject boundaries. The academic quality of Series II is overseen by the same team of editors.
